Public Health Intelligence Krishna Regmi, Ivan Gee, 2016-04-26 The first textbook on public health intelligence presents in depth the key concepts, methods, and objectives of this increasingly important competency. It systematically reviews types of evidence and data that comprise intelligence, effective techniques for assessment, analysis, and interpretation, and the role of this knowledge in quality health service delivery. The book's learner-centered approach gives readers interactive context for mastering the processes of gathering and working with intelligence as well as its uses in informing public health decision-making. And its pragmatic framework will help establish standards for training, practice, and policy, leading to continued improvements in population health. This path-breaking resource: Offers a comprehensive, up-to-date introduction to public health intelligence, a core area of public health competency. Is suitable for both graduates' and healthcare professionals' training and development for national and international contexts. Helps readers apply theory to real-life scenarios, from multi-professional perspectives. Features activities, case studies, and discussion tasks for easy reader engagement. Anticipates and examines emerging developments in the field. Public Health Intelligence - Issues of Measure and Method is bedrock reading for postgraduate and advanced undergraduate students in public health, global health, health policy, health service management, nursing, medicine, statistics, epidemiology, quantitative methods, health intelligence, health inequality, and other allied healthcare fields. It is also a salient text for public health practitioners and health policymakers. This book is a 'must-read' for students contemplating a career in Public Health or for anyone who is already in practice. The breadth of chapters from respected authors provide a detailed overview and critique of issues related to public health intelligence. A key strength of the book is that it is written with both students and practitioners in mind. Gurch Randhawa, PhD, FFFPH, Professor of Diversity in Public Health & Director, Institute for Health Research, University of Bedfordshire, UK

The Oxford Handbook of the History of Medicine Mark Jackson,2011-08-25 The Oxford Handbook of the History of Medicine celebrates the richness and variety of medical history around the world. In recent decades, the history of medicine has emerged as a rich and mature sub-discipline within history, but the strength of the field has not precluded vigorous debates about methods, themes, and sources. Bringing together over thirty international scholars, this handbook provides a constructive overview of the current state of these debates, and offers new directions for future scholarship. There are three sections: the first explores the methodological challenges and historiographical debates generated by working in particular historical ages; the second explores the history of medicine in specific regions of the world and their medical traditions, and includes discussion of the 'global history of medicine'; the final section analyses, from broad chronological and geographical perspectives, both established and emerging historical themes and methodological debates in the history of medicine.

Nursing History Review, Volume 26 Patricia D'Antonio, PhD, RN, FAAN,2017-08-15 Nursing History Review, an annual peer-reviewed publication of the American Association for the History of Nursing, is a showcase for the most significant current research on nursing history. Regular sections include scholarly articles, over a dozen book reviews of the best publications on nursing and health care history that have appeared in the past year, and a section abstracting new doctoral dissertations on nursing history. Cancer Patients, Cancer Pathways C. Timmermann,E. Toon,2012-10-10 Eleven essays by historians and sociologists examine cancer research and treatment as everyday practice in post-war Europe and North America. These are not stories of inevitable medical progress and obstacles overcome, but of historical contingencies, cultural differences, hope, and often disappointed expectations.

Thinking Like a Climate Hannah Knox,2020-08-24 In Thinking Like a Climate Hannah Knox confronts the challenges that climate change poses to knowledge production and modern politics. Drawing on ethnographic fieldwork among policy makers, politicians, activists, scholars, and the public in Manchester, England—birthplace of the Industrial Revolution—Knox

explores the city's strategies for understanding and responding to deteriorating environmental conditions. Climate science, Knox argues, frames climate change as a very particular kind of social problem that confronts the limits of administrative and bureaucratic techniques of knowing people, places, and things. Exceeding these limits requires forging new modes of relating to climate in ways that reimagine the social in climatological terms. Knox contends that the day-to-day work of crafting and implementing climate policy and translating climate knowledge into the work of governance demonstrates that local responses to climate change can be scaled up to effect change on a global scale.

Amateur film Heather Norris Nicholson,2019-01-04 Amateur film: Meaning and practice 1927-77 plunges readers into the world of home movies making and reveals that behind popular perceptions of clichéd family scenes shakily shot at home or by the sea, there is much more to discover. Exploring who, how, where, when and why amateur enthusiasts made and shared their films provides fascinating insights into an often misunderstood aspect of national visual history. This study of how non-professional filmmakers responded to the new possibilities of moving image places decades of cine use into a history of changing visual technologies that span from Edwardian visual toys to mobile phones. Using northern cine club records, interviews and amateur films, the author reveals how film-making practices ranged from family footage to highly crafted edited productions about local life and distant places made by enthusiasts who sought to 'educate, inspire and entertain' armchair audiences during the early decades of British television.

2010 [catalog] Degruyter,2010-12-16 Reviews are an important aspect of scholarly discussion because they help filter out which works are relevant in the yearly flood of publications and are thus influential in determining how a work is received. The IBR, published again since 1971 as an interdisciplinary, international bibliography of reviews, it is a unique source of bibliographical information. The database contains entries on over 1.2 million book reviews of literature dealing primarily with the humanities and social sciences published in 6,820, mainly European scholarly journals. Reviews of more than 560,000 scholarly works are listed. The database increases every year by 60,000 entries. Every entry contains the following information: On the work reviewed: author, title On the review: reviewer, periodical (year, edition, page, ISSN), language, subject area (in German, English, Italian) Publisher, address of journal

Posters, Protests, and Prescriptions Jennifer Crane,Jane Hand,2022-06-07 The National Health Service has provided Britain's healthcare since 1948. This institution has been the subject of tense political debate since its inception and has undergone a number of complex reforms and restructures. But the meanings of the NHS are not only - or even primarily - lived out in politics. Nearly every Briton comes into contact with the NHS - from cradle to grave - and this system of healthcare shapes society, culture and everyday life. This book charts these multiple meanings, looking at the NHS as a site of work, activism and consumerism, as a space and in cultural representations. Looking in these ways, the book shows how and why the NHS has become a symbol of Britishness and an object of fierce protectiveness, even love, today.

Placing the Public in Public Health in Post-War Britain, 1948-2012 Alex Mold,Peder Clark,Gareth Millward,Daisy Payling,2019-05-16 This open access book explores the question of who or what 'the public' is within 'public health' in post-war Britain. Drawing on historical research on the place of the public in public health in Britain from the establishment of the National Health Service in 1948, the book presents a new perspective on the relationship between state and citizen. Focusing on health education, health surveys, heart disease and the development of vaccination policy and practice, the book

establishes that 'the public' was not one thing but many. It considers how public health policy makers and practitioners imagined the public or publics. These publics were not mere constructions; they had agency and the ability to 'speak back' to public health. The nature of publicness changed during the latter half of the twentieth century, and this book argues that the relationship between the public and public health offers a powerful lens through which to examine such shifts.

Publics and their health Alex Mold, Peder Clark, Hannah J. Elizabeth, 2023-03-07 The COVID-19 pandemic has resulted in a renewed interest in the relationship between public health authorities and the public. Particular attention has been paid to 'problem publics' who do not follow health advice. This is not a new issue. As the chapters in this collection demonstrate, the designation of certain groups or populations as problem publics has long been a part of health policy and practice. By exploring the creation and management of these problem publics in a range of time periods and geographical locations, the collection sheds light on what is both specific and particular. For health authorities, publics themselves were often thought to pose problems, because of their behaviour, identity or location. But publics could and did resist this framing. There were, and continue to be, many problems with seeing publics as problems.
